

## Netistix Technologies Announces Distribution Deal with WebTech Wireless Inc.

Ottawa, January 17, 2006 Netistix Technologies, a Canadian company at the forefront of wireless fleet vehicle telematics, today announced a distribution agreement with WebTech Wireless (TSX-V:WEW), a global wireless services provider that develops, manufactures, and delivers turnkey wireless solutions.

Under the terms of the distribution agreement, WebTech Wireless will begin distributing the Netistix FleetPulse™ vehicle telematics product in Canada and the United States.

The FleetPulse™ product is a device that once plugged into a vehicle's on board diagnostic port (OBDII) collects information on various aspects of the vehicle's performance. The data is then relayed wirelessly to the customer's network where managers can review and collect data on a single vehicle or an entire fleet and schedule maintenance or other tasks as required.

WebTech recognized the value of the Netistix product, which offers this unique OBDII/WiFi based solution.

Gord Echlin, CEO of Netistix Technologies commented on the agreement with WebTech Wireless. "Having a company of this stature, enter into a distribution agreement is a coup for Netistix. We think our product complements their portfolio and that they will be successful in selling FleetPulse™ to their existing and new customers.

### About Netistix Technologies

Netistix Technologies Corporation develops, markets and sells innovative vehicle relationship management (VRM) systems for businesses that have significant fleet operations, including fleet management companies and their repair service providers. Netistix is privately owned and operated from headquarters in Kanata, Ontario – Canada's Silicon Valley North. The Branham Group has named Netistix to their 2005 list of Top 25 Up and Coming technology companies in Canada. Netistix is lead by a seasoned management and advisory team.
